Write a book to be worthy

First and foremost, I pay my respects to all my teachers who taught me, from whom I saw, I heard, and whose books I read. I had read plenty of books throughout my life.

But I appreciate as long as I have capability of writing a book. Either a self-bought one or a gift, I treasure a book like a sacred image. If somebody comes to greet me and names himself as an author, I am proud to meet him. Authors are the light of a country. Obtaining a permission to print is more significant than to become a writer. An author is a teacher too. When a new author was born, I regard him as a new teacher.

The world of learning can never come to an end, from elementary to advanced levels.

Several subjects and lessons are to study from various teachers. When I left school, all writers who contribute in newspapers, journals and magazines become my teachers and went on learning the philosophies of life. Writers are treasures of our country. They are constantly teaching commercial, social, educational, and health to the public. It is sad to see the majority of writers in Myanmar are poor, Plenty pupils, penniless palms are not only teachers but writers too. I don't see a very rich author in Myanmar. In other countries, they really are rich and admired by the people. I had studied this and found that Myanmar authors here sell their manuscripts copyrights for $100 and $300 to the publishers.

That's to settle the author's daily need. However famous he is, he realizes his book will sell like hot cakes; he doesn't have finance to publish his book by himself. In such case, he has to let the copyright go into the hand of the publisher. At the bookshops I find those famous authors' books in bad shape, bad cover design, inappropriate font and inferior quality papers. Every time you riffle, its pages easily come out. For a publisher, a best-seller need not invest much money in it. It's sure, the market is there. He minimizes its cost to maximize the profit. A good book comes out badly. Most bibliophiles feel less earnest to save inferior quality product for life.

Famous authors' books are sometimes found in countryside homes, but never on a bookshelf decently, found here on the steps; see there in the dust and everywhere on the floor. If a book is to sell with copyright, it is to be so and so in the contract to publish as a pleasant one. The author quotes the selling price if possible. Check when it comes out, so is to be a good quality book in the market. The writer should respect his readers by publishing a book, save-worthy for life.

Turn your back on the book you had written is making yourself get into a ditch to poverty. This kind of writer is never prosperous and live from hand to mouth. If you write a book read worthy, the good publishers will approach you. You can quote the price. So write with mood, with aspiration. Don't bodge up a book and make yourself cheap and worthless. Write a book a book.

I would like to tell you my experience in 2006 I wrote a book, Tranquillity between parents and offsprings. It's three pages of a heading Permit me see the waving palm of my parting mother again! were offered $ 3000 by a publisher to transform into a comic. I didn't sell. He approached me again and offered $ 30000 for the complete book! Still I didn't sell. I had written it with a great inspiration. He foresaw the outcome! Nobody would pay such much without a reason. I was right and was lucky. Within five years, it had to be printed again and again up to 1,000,000 copies!

The book is for every family, as long as there are parents and offspring in the world, the market for my book will be alright. The result and benefit of a good book is beyond a guess. I got to Beijing in June 2007. Whenever get to a city, I look for the type of car I like, take photographs of the beautiful buildings with pleasant designs, find my favourite mobile handset in the supermarkets. I spare time for that. The next is visiting the book shops. I spend times in the book shops. These four things I used to do wherever I got. All book shops I visited in China, Malaysia, Singapore, Thailand and America the books were very impressively displayed in careful order.

The covers of the books were attractive, in good binding I noticed thin books are not common in these countries as in Myanmar. The cheapest book was around $8.50.

Most books were over $10. When a writer finished writing a book, he earns like gaining a lottery. Everybody admires a writer. They impress people. They are rich. Why I could say that __ when I was there, they asked me what I do for a living. I said I am a writer. Their faces suddenly showed a great respect. They told me writers in their countries are rich. They are the elite in the community. Chicken soup for the soul. The book, that Pe Myint, a well experienced translator turned it into Myanmar, is mere a palm-sized book.

I ask him, if he earned $13000 for that. "Sure not" will be his reply! The author who wrote this book sold its copyright to a publisher after three years. You guess how much he earned! It collected $1,000,000! It's like winning a lottery. That's why; writers in other countries are rich! They write a book with great aspiration. The readers know its value. That's the difference between our writers and theirs. Since at a tender age I've been a bibliophile and a voracious reader. I note down every book I read. The knowledge I gain flows into the brain. This book in the dear reader's hand can be an anthology. I read many books and took 18 years to rewrite this book

When water is heated it becomes hot water. Likewise all books I'd read digested and reborn as a new book. In other words, it is a digest of 1000 writers' ideas, the view of countless teachers, from whom I saw, I heard, blended with the best knowledge gained from the experience of life. Name as you pleased.

It's not possible to express here the list from whom I had learnt, seen, and heard. Because there were too many of them, you may forgive me for that. Whatever it is if I had learnt something useful from someone, I assume him as my teacher. Idea, concept, stories, or the style of writing in this book are your experience, your event, and story you feel from which book so and so. I shall neither shake my head nor deny it, but simply respond with a nod. I pay homage to all my teachers, writers, abbots who wrote many books for me to read and to all I owe, with this book.

Introduction No. 1 Millionaire Mind

A man's prosperity does not depend only on his work but on his social efficiency. It highly depends on his social skills to succeed or lose. Ambition, long term plan, management in anticipation are not enough to be on paper alone. It needs to go into communities to materialize practically to gain success and prosperity. One who really wants to be successful, do earnestly what he chooses. Believe only when the good result is seen. Confidence gets earnestness and high efficiency. Either the success or failure of an enterprise, a company or a society depends on the leader; and his high quality capacity of leadership. The higher his efficiency the more progress his society becomes. If a sheep tends ten tigers, they all will turn to be timid. If a tiger tends sheep, they will turn to be brave. The leader's capability in social skills will effect the entire organization. Efficiency of each staff shows whether a society is good or bad.

A sheep as a leader will not give up all challenges of the competitive world. It's to manipulate management, activity, research and social skills to have a high quality of a society. Use sociology as a powerful weapon to control the entire enterprise effectively without a loophole. Must understand the set basic rules and regulations planned accordingly with the project and boost the morale of each staff. Designate day, month, year etc. to start the projects. Check whether it goes well with the plan or not after three or six months. The strategies can't go well as expected when there is no accurate management and sociology. If so, don't ask why? Make yourself determined. If you do not believe in your work, lack of wish, you will abandon it once you start thinking of what should you do.

Something that appears in mind is aspiration, a thing that always in your heart subliminally develops with time. It's the one that is in heart all the time. *When there's a will, there's a way!* Find way to do, if you wish. No excuse. Setting right path and quick decision make fast development. All lectures in No. 1 Millionaire Mind will support your development and success accordingly with region, environ and discipline of the humanity.One who has skills in sociology can overwhelm very rich, powerful, high-ranking and highly intellectual persons. Many institutes in other countries teach sociology in classes as a separate subject. In Myanmar, it has been taught from mouth to ear, father to son, one generation to another, but most of these teaching do not intend to one's prosperity, seem to know etiquette but commit small faux pas and be in big trouble at last. Never forget these small matters depose the great leaders. Is it that big? You might not accept.

I'll tell you an example.Let's pretend,you are a rich businessman cum a departmental head to discuss an important project with somebody while having lunch in a restaurant. A speck of watercress, a leek or coriander on your tooth may draw the attention of the other party, than what you are discussing. In such case, the listener may not be serious. Assume you ungentlemanly. It seems to be a small matter, but will understand more if you are in his shoes. No.1 Millionaire Mind Sociology School is unprecedented in Myanmar. It is non-profit-making school but for the benefit of all.

No.1 Milllionaire Mind will help the majority to succeed in a moment. Change your environment in advance. It means to change yourself first . Change all your behaviour. How? Answers to this can be seen in the book The Way to Victory and Sociology Course. **No.1** will make the best. All No.1 School's trainees must become leaders. Must be able to overcome any difficulty and barrier by sociological theories in the competitive world of business. No.1 people must know the knack of people. No need to spend much time. Just read this book till to the end. Apply the content. Your former opinion, your concept will be transformed automatically in an hour. You will come to know which way to go, who to contact, how to penetrate the market.

Either read this book or ten days at the No.1 School, you will be fully equipped in an hour to protect yourself for the battle of life from that day on to achieve what you want. However big it is,you will get it. Most people think the key to success is money but the author confidently says, it's sociology than money. Good words rules the country. You can influence the community. Prepare what to do and what to avoid in advance. The smart and the good will approach you. Apply sociological skills, show your capability and determine to earn success in anyway. Believe yourself and fight for the success.

To be a business leader, one must be skilled at sociology. Your demands on your people must be firm. Follow your own set of rules and regulations. Be incharge, have courage to criticize and point the mistakes. Make the wrong right. I believe, anyone who would like to succeed can follow all in the book. It's more significant to choose than to work hard to achieve something. The best choice of 21st centuary must be No.1 **Millionaire Mind** . However hard you try, wrong choice may return failure. The result of failure will send you back to your former place. Only the right choice will make you a good leader. A good leader must be able to guide others and have good character. Your choice must not harm your family and your colleagues. Don't do what shouldn't! Don't say what inappropriate! Don't take that doesn't belong to you! Don't eat what may harm you!

Don't wear what indecent! Don't go to and don't stay at a wrong place!You must follow these guidances or you will be in great trouble. No.1 Millionaire Mind properly will guide you to be a successful leader.

The writer believes you'll be successful on that day you get this book in your hand. It's worth to be man only when succeed! Man was not born to lose but to achieve. Stand on your own to do what you like. There is no such thing as failure in life but lesson, no problem but challenge! Transform all problems into challenges. Once you consider as problem it makes you depress. Think as challenge, boost your spirit up.Even if you are in the nadir of life, The Way to

Victory & Sociology Course will send you to the zenith. The certainty to succeed is to learn and to do when needed, whether you like it or not. Just do it.

Everyone makes his own fate. If not it will be made by others. Every man has right to choose till the last moment. Don't mind yourself a dead person. If you can trust other, don't say,you don't trust yourself. Mao Zedong once said, "Fight to get, it if you can't get by beg. Fight and fail, fight and fail, again and again. The victory at last! Do you have a spirit like this? If yes, it's certain to succeed. The secrets to success are in The Way to Victory & Sociology Course. By means of reading **No.1 Millionaire Mind,** I'll say you are the **No.1** and end my prologue here.

These are the national advantage of No.1 Millionaire Mind Training School. It's said the world to be a big village, developing in communication. However good the technologies __ sociology, the art of dealing with people is still needed to know.It needs social skills and good friends to float and flow in the world competitive commercial current.

In 21st century, good friends are true investment but not money. The developing countries mind HR as a priority for development. HR in technological sector, educational sector, cultural exchanging sector, mechanized sector, foreign exchange sector, and commercial transaction sector collaborate effectively without regarding race or religion could build a modern developing country. Sociology as major role in commercial project, good at sociology leads great benefits beyond expectation. One swallow doesn't make a summer. It needs unity to achieve a goal that is not possible individually, extending helping hand mutually to become world leading business persons.

The Founder's Prologue.

Everyone must have value for a country to develop. What is valued person? Must be healthy, prosperous,. Must be able to support your family, your relatives, your vicinity; your religion, your native land, your country and your people. Must have clean money to donate freely. The author sees every man as a valued person and believe each has his own talent. Base this concept to extract human resources. The beggar at the road side has his certain value. We can't let him die. For example he collects used plastic. The municipal councils save a worker doing this. He brings plastic to the wholesaler, gets money, buys rice, oil, salt, cakes or water bottle at the grocery. Grocer earns money! His work makes everybody convenient.

If the plastic collector dies, the councils has to hire a worker to do the same. The wholesaler gets less plastic. The grocer loses a customer, harm rice merchant, oil wholesaler, baker, drinking water maker, and to the revenue department. Nobody can't deny that The strength of a country lies within . A prosperity or recession of a country depend on its people's mind and behavior. Good things make benefit, bad will return disaster. High moral standard is first and money is to be in a second place to develop a country. Spitting betel chewing in the public, wasting time at the teashop, at the snooker, low spirit, bad character, misconception, freeloading, bullying, selfishness, lovelessness are all of the destructive nature, and pessimism.

All these are destructive to development, and patriotism.The world's entire population be healthy, happy, prosperous and free from any danger.
