

TABLE OF CONTENTS

Preface	1
Introduction	2
<b>Chapter 1 .What is Android</b>	<b>5</b>
Brief History of Embedded Device Programming	6
Open Handset Alliance and Android	9
Introduction to Android	10
<b>Chapter 2 .Downloading and Installing Eclipse</b>	<b>13</b>
Why Eclipse?	15
Downloading and Installing the JRE	16
Downloading and Installing Eclipse	22
<b>Chapter 3 .Downloading and Installing the Android SDK</b>	<b>25</b>
Downloading the Android SDK	27
Downloading and Installing the Android Plugin for Eclipse	28
Configuring the Android Plugin for Eclipse	33
<b>Chapter 4 .Exploring the Android SDK</b>	<b>37</b>
What is in the Android SDK	38
Android Documentation	39
Android Samples	41
Try This . Run the API Demos Sample Application	42
Android Tools	46

APIs	50
Application Life Cycle	51
Standard ASP Application Life Cycle	52
Android Application Life Cycle	53
<b>Chapter 5 .Application . Hello World!</b>	<b>55</b>
Creating Your First Android Project in Eclipse	57
Examining the Android-Created Files	62
AndroidManifest.xml	63
Referenced Libraries	64
Directories	65
Hello World! Again	72
Hello World! Using an Image	75
Hello World! Code-Based UI	79
Hello World! XML-Based UI	81
Try This. Use TextView and ImageView	85
<b>Chapter 6 .Using the Command-Line Tools and the Android Emulator</b>	<b>87</b>
Creating a Shell Activity Using the Windows CLI	88
Running the ActivityCreator.bat	89
The Project Structure	93
Creating the Hello World! Activity in the Windows CLI	99
Editing the Project Files	99
Adding the JAVA_HOME Variable	101
Compiling and Installing the Application	102
Hello World! on Linux	114
Configuring the PATH Statement	115
Try This. Create an Image-Based Hello World! in the CLI	121

<b>Chapter 7 .Using Intents and the Phone Dialer</b>	<b>123</b>
What Are Intents?	125
Using the Dialer	131
Placing a Call from Your Activity	136
Adding the Intent to Your Activity	136
Editing Activity Permissions	139
Modifying the AndroidPhoneDialer	145
Adding a Button	145
Implementing an EditText View	151
Try This. Modify the AndroidPhoneDialer Project	155
<b>Chapter 8 .Lists, Menus, and Other Views</b>	<b>159</b>
Building the Activities	161
Intent Code for the .xml File	162
Intent Code for the .java File	164
Modifying the AndroidManifest.xml	165
Using the Menu	168
Creating the Activity for AutoComplete	175
Button	185
CheckBox	190
EditText	195
RadioGroup	200
Spinner	206
Try This. Modify More View Attributes	212
<b>Chapter 9 .Using the Cell Phone's GPS Functionality</b>	<b>213</b>
Using the Android Location-Based API	214
Creating a kml File	215
What Is a track File?	218
Getting the nmea File in Windows	218

Getting the nmea File in Linux	220
Reading the GPS with the Android Location-Based API	223
Creating the AndroidLBS Activity	223
Passing Coordinates to Google Maps	233
Adding Zoom Controls	237
Try This . Toggling Between MapView's Standard and Satellite Views	244
<b>Chapter 10 .Using the Google API with GTalk</b>	<b>249</b>
Configuring the Android Emulator for GTalk	251
Implementing GTalk in Android	254
Creating the Activity's Layout in the GoogleAPI.xml	255
Adding Packages to GoogleAPI.java	257
Implementing the View.OnClickListener	258
Compiling and Running GoogleAPI	263
Try This . Add a Settings Feature to Your GoogleAPI Activity	266
<b>Chapter 11 .Application . Find a Friend</b>	<b>267</b>
Creating a SQLite Database	270
Creating a Custom Content Provider	274
Editing the strings.xml	274
Creating Your Content Provider	277
Creating the FindAFriend Activity	287
Editing AndroidManifest.xml	287
Creating the NameEditor Activity	289
Creating the LocationEditor Activity	294
Creating the FrinedsMap Activity	303
Creating the FindAFriend Activity	309
Running the FindAFriend Activity	312
Try This. Real-Time Location Updating.	315

<b>Chapter 12 .Android SDK Tool Reference</b>	<b>317</b>
Android Emulator Commands	318
Android Debug Bridge Commands	321

Preface
