

CHAPTER 1 GETTING STARTED

1.1	The AutoCAD Environment	10
1.2	Different Coordinate Systems	14
1.3	Viewing Objects	18
1.4	Create Basic Objects	21
1.5	Combine and Fill Objects	26

CHAPTER 2 OBJECT PROPERTIES AND INQUIRY

2.1	Control Properties of Objects	31
2.2	Geometric Data Entry	33
2.3	Measuring and Dividing	38
2.4	Finding Distance and Angle	41
2.5	Selection Methods	49
2.6	Drawing Accuracy	50

CHAPTER 3 MODIFY OBJECTS

3.1	Moving Objects	58
3.2	Rotating Objects	60
3.3	Aligning Objects	62
3.4	Offsetting Objects	64
3.5	Mirroring Objects	66
3.6	Trimming Objects	70
3.7	Extending Objects	71
3.8	Reshaping Objects	73
3.9	Filleting Objects	74
3.10	Chamfering Objects	77
3.11	Breaking and Joining Objects	79
3.12	Create an Array of Objects	81

CHAPTER 4 CREATE BLOCKS

4.1	Create and Insert Blocks	86
4.2	Inserting Drawing Files	89
4.3	Divide and Measure Blocks	92
4.4	Create the External Blocks	95
4.5	Using External References	97
4.6	Dynamic Behavior to Blocks	101

CHAPTER 5 MODELING 3D OBJECTS BASICS

5.1	Create 3D Solid Primitives	110
5.2	Create 3D Solids from Objects	118
5.3	Create Solids by Sweeping	129
5.4	Create Solids by Lofting	138
