

Contents		Chapter 3		Chapter 5		Chapter 7	
Chapter 1		Air Flow		Design		Fire Protection Equipment	
Hood		3.1 Air Flow 25		5.1 Design and Equipment Selection for Commercial Kitchen Ventilation System 65		7.1 Fire Protection System 151	
1.1 Introduction 1		3.2 Down Discharge Supply Air Designs 27		5.2 Types of Filtration Technologies 65		7.1.1 Dry Chemical Systems 151	
1.1.1 Kitchen Exhaust System 2		3.3 Short Cycle Supply Air 28		5.2.1 Water Mist, Waterfall and Water Bath 67		7.1.2 Wet Chemical System 151	
1.1.2 Kitchen Hood Types 2		3.4 Front Panel Make-up Air 29		5.2.2 Electrostatic Precipitators (ESPs) 67		7.1.3 Water Sprinkler System 151	
1.1.3 Canopy Types 5		3.5 Exhaust and Make-up Air Limitations 29		5.2.3 Pleated or Bag Filter of Natural and Synthetic Fiber 68		7.2 Working Process of the Water Mist System 151	
1.2 The Composition of Air 7		3.6 Why Ventilation Systems are Essential? 33		5.2.4 Active Carbon Filters 69		7.3 Comparison Between Water Mist System vs Sprinkler System 157	
1.3 Grease Extraction Rates 11		3.6.1 Venting Cooking Equipment 33		5.2.5 Oxidizing Pellet Bed Filters 69		Chapter 8	
1.3.1 Filters (Stainless Steel Baffle Type GF Series) 11		3.6.2 Maintaining Negative Pressure 34		5.2.6 Incineration 69		Trouble Shooting	
1.3.2 Filter Grease Extractor Chambers (Cyclo Maze Series) 11		3.7 Combination of Equipment 34		5.2.7 Catalytic Conversion 70		8.1 Trouble Shooting 159	
1.4 Grease Extraction Unit as an Engine 14		3.8 Air Flow Requirements for Exhaust Hoods 36		5.2.8 Liquid Order Control Systems 71		8.1.1 Air Conditioning Systems 159	
Chapter 2		3.9 Air Flow Calculations for Hoods 38		5.3 Exhaust System Terminations 71		8.1.2 Actuators / Damper Motors; Trouble Shooting 161	
Ducts		3.10 Productivity and Room Air Temperature 42		5.4 Outside Wall 74		8.1.3 Couplings 162	
2.1 Ducting System 17		3.11 Design Considerations 42		5.5 Types of Installations 74		8.1.4 Control Devices (Electronic) 162	
2.2 Ducts & Ventilation Rates 18		3.12 Kitchen Exhaust Duct Sizing & Materials 43		5.6 Odor Control 79		8.1.5 Cycle-Wash Units 162	
2.3 Openings 19		3.13 Exhaust Hoods 44		5.6.1 Liquid Odor Solution 80		8.2 Problem Consideration 166	
2.4 Ducting Installation 19		3.14 Sample Calculation for Exhaust Hood Air Flow 46		5.6.2 Special Odor Problems 80			
2.4.1 Duct Installation Clearances 20		3.14.1 Fresh Air Calculation 47		5.7 Elements of Ventilation Design 80			
2.4.2 Exterior Installation 21		3.14.2 Calculation for Filter Requirements of Exhaust Hood 48		5.8 Options 83			
2.4.3 Interior Installation 21		3.15 Exhaust Fan 49		5.8.1 Efficiency and Costs 83			
2.5 Exhaust Terminations 22		3.16 Types of Exhaust Fans 50		5.8.2 Factors that Govern Choice 83			
		3.16.1 Up-blast Fan 50		5.8.3 Placement of Equipment 84			
		Chapter 4					
		Maintenance for Commercial Kitchen Ventilation					
		4.1 Cyclo-wash and Cyclo-Maze Wash 59					
		4.1.1 Automatic Cleaning 59					
		4.1.2 General Requirements for Start-up 50					
		4.2 Control Panel 62					
		3.16.2 Utility Fan 51					
		3.16.3 Inline Fan 52					
		3.17 Fan Selection 53					
		3.18 Roof Top Termination 54					
		3.19 Grease Containment 54					
		3.20 Wall Termination 55					
		3.21 Make up Air 56					
		3.21.1 Direct Fired Make up Air Units 56					
		3.21.2 Indirect Fired Gas Make Up Air 56					
		3.21.3 Stream Heat or Hot Water Coils 56					
		3.21.4 Electric Coils 56					
		3.21.5 Heat Recovery Units 56					
		3.21.6 Cooled Air 57					
		5.8.4 Sound Level 84					
		5.8.5 Heat Source 84					
		5.9 Kitchen Exhaust Hood Fan Installation 85					
		5.9.1 Option A; Central Fan for All Kiosks 85					
		5.9.2 Option-B; Separate Exhaust for Each Kiosk 85					
		5.9.3 Option C; Central Ecology System 88					
		5.9.4 Option-D; Central Fan and Separate Filters 90					
		5.10 Filtration System 91					
		Chapter 6					
		Design					
		6.1 Ecolair Installation Instructions and Design Requirements 95					
		6.1.1 Mechanical Installation 95					
		6.1.2 Electrical Installation 96					
		6.1.3 Other Design Requirements 96					
		6.2 Connections and Installation Details 103					
		6.3 Counters 121					
		6.4 Dish Tables 126					
		6.5 Drawers 133					
		6.6 Shelves 136					
		6.7 Tables 140					
		6.8 Wall Cabinets 149
